Webinar
"Cybersecurity Essentials for Businesses"

As much as the Internet has offered new opportunities for business growth, it has also posed novel cybersecurity challenges and threats to the businesses. How could the enterprises stay safe from cybersecurity threats to protect their customers and data? In this webinar, we have invited an information security expert to walk you through the essentials of cybersecurity. He will highlight the latest threat trends, common types of cyber attacks as well as providing recommendations on preventive measures and remedies to keep you safe from cybersecurity threats.
