The digital transformation undoubtedly brings enormous business opportunities for enterprises, but it also brings numerous cyber security concerns. As cyber security incidents become more frequent, it is more necessary for enterprises to enhance their network resilience, deepen their understanding of cyber security, and properly respond to cyber threats, to protect their data assets comprehensively. This seminar invites experts in technology crimes and cyber security to share their insights on local network crime trends, case studies, enterprise cyber security and employee awareness, with a view to helping SMEs in reducing the risks of cyber security threats.
