Facing global trade challenges, traders are actively exploring different options to find business opportunities and diversify risks, including setting up manufacturing plants in Hong Kong to enjoy the benefits of exporting products with Hong Kong origin. The seminar will introduce the Hong Kong Origin Certification System, administered by the Trade and Industry Department. The system's objective is to facilitate the export of Hong Kong products to other markets or meeting the requirements of importing authorities, as well as to enable traders to enjoy preferential tariff treatment under free trade agreements between Hong Kong and other economies. Representatives from the Centre for Food Safety, Food and Environmental Hygiene Department will also introduce latest facilitation measures for exports of food products to the Mainland under the Mainland and Hong Kong Closer Economic Partnership Arrangement (CEPA).
