Among the three pillars of Environmental, Social and Governance (ESG), governance (G) is a key driving force behind sustainable business growth. How can SMEs strengthen transparency, enhance risk management and build market trust through good governance and thereby create value and unlock new business opportunities? In this seminar, an industry expert will share through real-life case studies to explore how enterprises can implement ESG practices with limited resources, and turn governance strengths into brand credibility, partnership opportunities and driving force for business growth, with a view to assisting SMEs in taking a confident step towards a sustainable future.
