

“Know the Security of your Mobiles and Personal Data Protection ?” FREE Seminar

In this Seminar series, HKPC will explore the security threat of mobile device and personal data protection which most large enterprises fail to protect & led company with **huge losses in reputation, revenue & regulator’ s penalties**. With the proliferation of mobile devices there is a strong need for enterprises to secure corporate resources from these less secure access points. This is especially important when BYOD (Bring Your Own Device) model become inevitable for business users.

Throughout the seminar HKPC will introduce the affordable & Best-in-class total security solution that enables organizations to easily move to “Mobile First” strategy, to build feature rich, cross platform, integrated apps rapidly without hassles. In this event, you will learn how to:

- Secure the BYOD for business use without sacrificing the convenience for your personal use
- Enhance security protection for personal data to mobile in-cloud or on-premises
- Protecting your data everywhere
